

# This is the Title

Body text below the title.

## Level 1 Header 1

Here is some text located above two clearly separate tables, which are however positioned with some vertical overlap.

This serves as a check for the fidelity of how this page's content is reproduced as a **Markdown** formatted file. We are also capable of outputting *italic* and ***bold-italic*** text!

## Level 2 Header 1

Text under header 1 of level 2.

1	2	3
4	5	6
7	8	9

Column1	Column2
Cell (0, 0)	Cell (0, 1)
Cell (1, 0)	Cell (1, 1)
Cell (2, 0)	Cell (2, 1)

This is some text **below** both tables. It serves as a check how standard text is being resumed after the output of the above tables.

Let's try the output of an ordered list:

1. Item A
2. Item B
3. Item C

And now an unordered list:

- \* Item 1
- \* Item 2
- \* Item 3
- \* Item 4

## Level 2 Header 2

Finally some program code for entertainment:

```
import fitz
doc = fitz.open(filename)
for page in doc:
    print(page.get_text())
doc.close()
```

This text appears below the code snippet. What happens with `inline code` pieces?
